

ABSTRACT OF THE DISCLOSURE

When there is an incoming call during the reproduction of television broadcast, the received television broadcast data is recorded into a
5 video/audio recorder on the basis of the operation of a talk key. On the basis of the operation of a hold key, not only the television broadcast data recorded in the video/audio recorder is reproduced, but also the received television broadcast data is written over the
10 area in which the reproduced television broadcast data was recorded.
